ABOUT SNL

Saudi Net Link Company was established in the Kingdom of Saudi Arabia in 1995. It is one of the leading Telecommunications Companies and has offices in Jeddah, Riyadh and Al-Khobar.

Saudi Net Link has a reputation for its high-speed growth and success with new technologies.

SNL - VSAT Managed Services

Broadband Internet Service

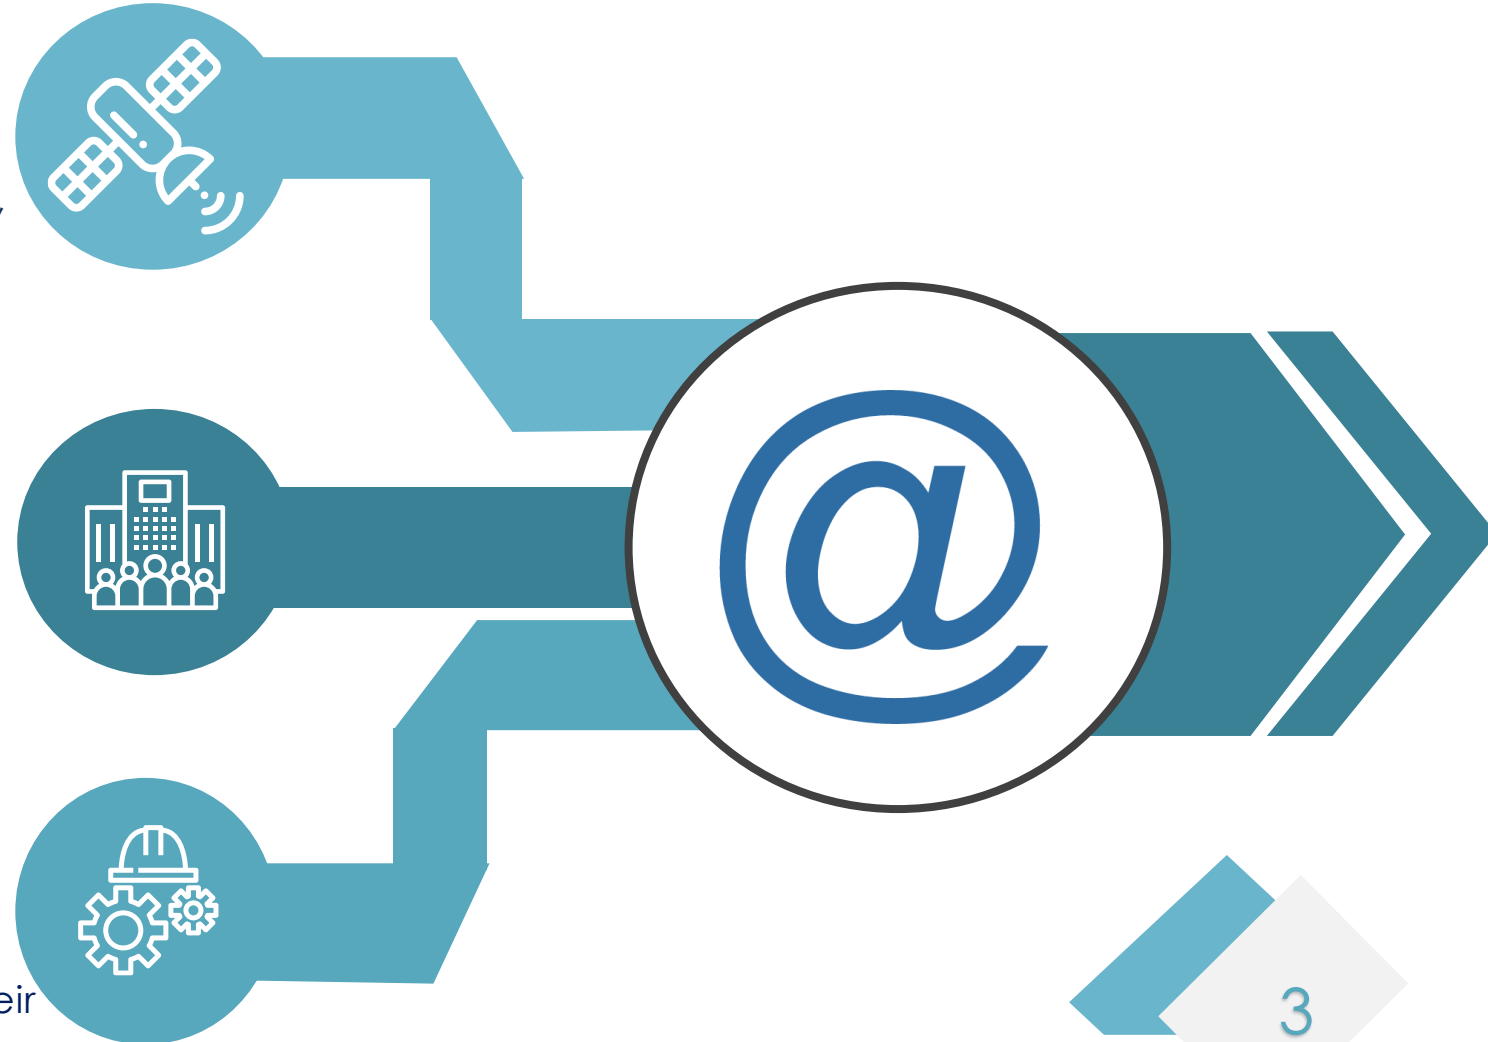

SNL is a licensed VSAT provider and ISP in Saudi Arabia which uses a two way internet satellite service. SNL owns a HUB station located in the UK, two others located in Saudi Arabia, and operate more than 900 remotely.

Enterprise

SNL provide Turned Key solutions and services to many corporates and companies to meet their business requirements; in terms of providing connectivity between their data, voice, video, and other applications.

Operation & Maintenance

As Part of our services SNL provide VSAT network operation services to governmental, military and commercial companies to manage and Operate their VSAT network.

Operation & Maintenance

Network Operation Centre (NOC)

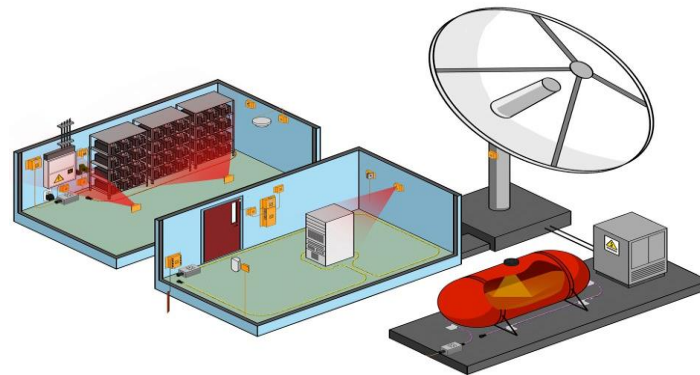

Managing & Operating 24/7 network operation centres doing the following tasks:

- ▶ Point of contact of all VSAT remote users.
- ▶ Conducting isolation tests with technicians during the installation Of VSAT remote terminals.
- ▶ Monitoring the VSAT network and satellite space segment.
- ▶ Managing the ticketing system.
- ▶ Dispatching the technicians to the field in case of on-site- support needed
- ▶ Reporting network availability, Key Performance Indicator (KPI).

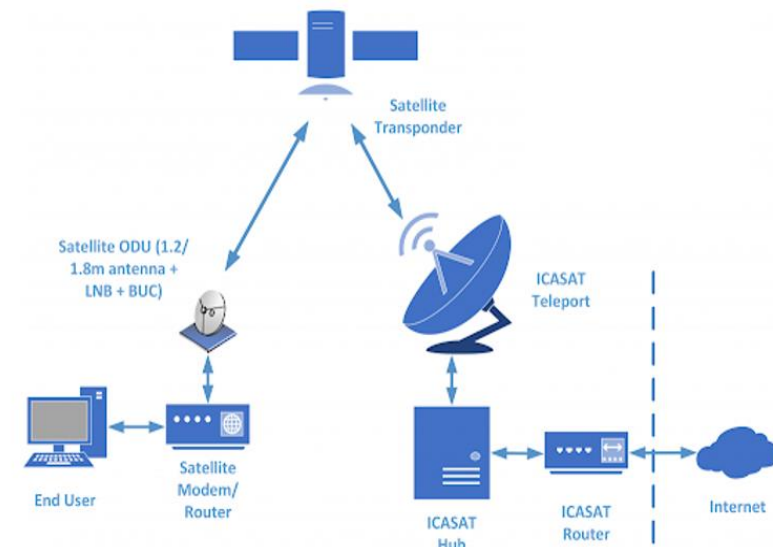

Teleport Service

Saudi Net Link provides a range of advanced

VSAT Remote Fields Support

- ▶ Field services operation for all kind of VSAT systems under O&M and SLA

Broadband Wireless Solutions

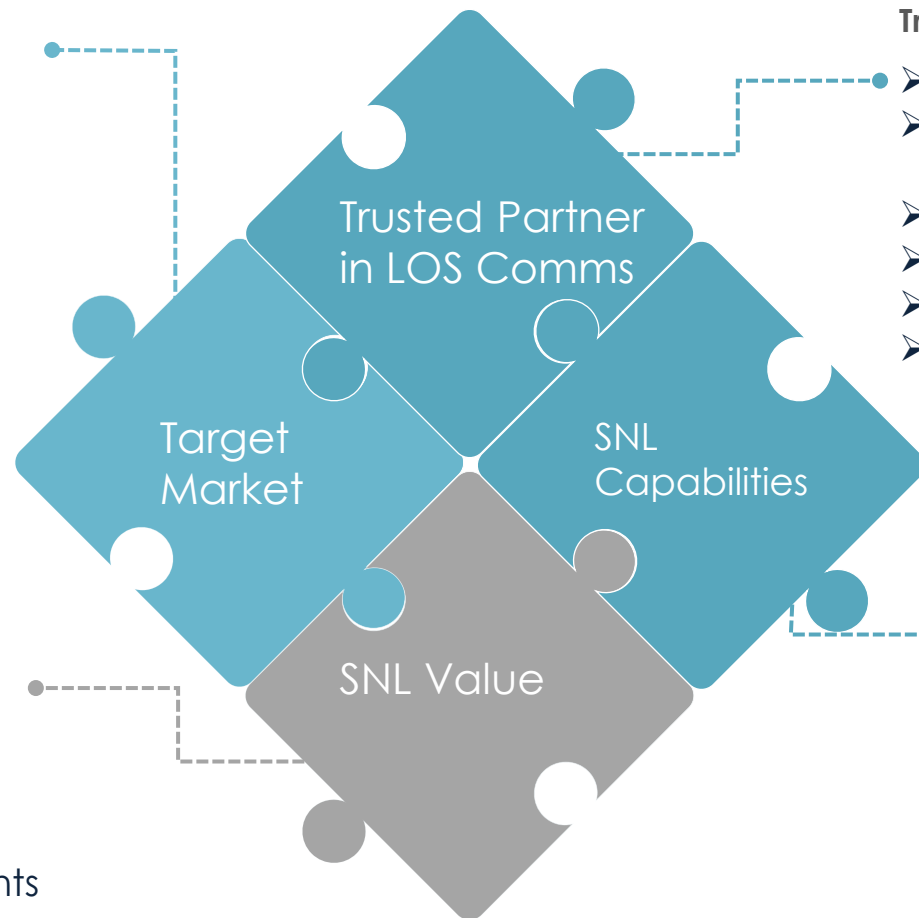

SNL is a market leader in designing broadband wireless communication systems in non-traditional, highly mobile, highly rugged environmental conditions for terrestrial land and sea-based Comms-On-The-Move (COTM), Wireless Local Area Networks (WLAN) and Nomadic Wireless Wide Area Networks (WWAN).

Target Market

- Oil & Gas
- Naval Operation
- Ship to Ship and Ship to Shore
- Coastal protection / Boarding forces
- Army Operations
- Backhaul, Radio Relay
- Air Force
- Disaster Recovery

SNL Value

- Eliminate complexity in deployment of wireless communications
- Increase battlefield mobility
- Reduce recurring costs for communications
- Convert customers trust in broadband communications in tactical environments

Trusted Partner in LOS Comms

- Ensure link Quality
- Maximize Data Rates in Backhaul Communications
- Enable Mobility
- Quickly deploy Backhaul for LTE, WiMAX, Wi-Fi
- Augment STACOM
- Reduce paid service reliance

SNL Capabilities

- Cutting edge
- Highest Link Performance in divers and changing environments
- Supports high speed tracking

RF integration Services

01

Provide telecom rooms (SHELTERS)

05

RF switching and redundancy controllers

09

Antenna control units' installation & integration

02

Wave guide systems and dehydrators

06

Indoor RF devices integration to Antenna

10

Tracking systems & beacon receivers

03

IFL systems coaxial RF cables & optical fiber IFL systems

07

Outdoor RF devices integration to Antenna

11

RF switching systems & matrixes installation and integration

04

WG integration kits to RF devices

08

RF leakage inspection & grounding systems

12

Video and Audio coax systems

Training

Cyber Security Training

MSSP

Managed Cyber Security Services (SoC)
Secured Cloud Infrastructure and CoLocation
Business Continuity and Disaster Recover
Malware and Ransomware Protection

Professional Services

Consulting Services
Readiness Assessment
Penetration Testing
Gap Analysis
Framework Compliance Audit and Certification

Fuel Automation & Smart Station IS

- HIGH TECHNOLOGICAL
- MODULAR
- FLEXIBLE
- **SOFTWARE** AND **HARDWARE** SOLUTION

FOR DELIVERING CONTROL TO

- PETROL STATIONS
- HOMEBASE PETROL SITES
- IN-HOUSE STATIONS
- FLEET MANAGEMENT CENTERS

Tactical Command Vehicles

Communication trailer
