SAUDI NET LINK

ABOUT US

Established in the Kingdom of Saudi Arabia in 1995, Saudi Net Link Company stands as a pioneer in the development of sophisticated hybrid space/terrestrial data and streaming media networks. Committed to delivering unparalleled services to our esteemed customers, SNL's dedicated team ensures the provision of reliable, high-quality products. With an unwavering focus on excellence, we strive to offer the very best in services to meet and exceed customer expectations.

VISION

We aim to position ourselves as the leading provider of cutting-edge ICT solutions and wireless communication services within the Kingdom of Saudi Arabia. Furthermore, we extend our commitment to excellence across the broader Middle East, including North Africa, with the goal of making a meaningful impact on a global scale.

OUR COMMITMENT

Continuously advancing and broadening our spectrum of solutions, we engage with clients to deliver a standard of quality and objectivity that surpasses expectations. Leveraging cutting-edge end-to-end technologies, we are dedicated to meeting the ever-evolving aspirations and requirements of our clients worldwide.

VSAT
MANAGED SERVICES

VSAT MANAGED SERVICES

SATELLITE INTERNET SERVICE

SNL is a licensed VSAT provider and ISP in Saudi Arabia, specializing in a robust two-way internet satellite service. With ownership of a cutting-edge HUB station situated in the UK and two additional stations in Saudi Arabia, SNL efficiently operates a network that spans over 900 remote locations.

ENTERPRISE CONNECTIVITY

SNL provides comprehensive, turnkey solutions and services tailored to the specific needs of numerous corporations and companies. We specialize in facilitating seamless connectivity between data, voice, video, and other applications, ensuring that our clients' business requirements are met effectively.

OPERATION AND MAINTENANCE

As part of our services, SNL excels in VSAT network operations, offering specialized solutions to governmental and commercial entities. We extend our services to military organizations, providing expertise in managing and operating their VSAT networks with precision and efficiency.

رابط الشبكات السعودية
SAUDI NET LINK

OPERATION AND MAINTENANCE

NETWORK OPERATION CENTRE (NOC)

SNL manages 24/7 network operation centers, handling tasks such as user support, isolation tests during VSAT installation, continuous monitoring of the network and satellite space, ticketing system management, on-site support dispatch, and reporting network availability and KPIs.

TELEPORT SERVICE

Saudi Net Link excels in providing cutting-edge teleport services, ensuring seamless and efficient communication for diverse needs, including governmental, commercial, and military applications.

VSAT REMOTE FIELD SUPPORT

Our field services operation expertly manages all types of VSAT systems under O&M and SLA, ensuring optimal performance, preventive maintenance, and prompt issue resolution.

VSAT REMOTE TERMINALS

FIXED ANTENNA

FLYAWAY ANTENNA

AUTO-ACQUISITION ANTENNA

STABILIZED ANTENNA

VSAT MOBILITY SOLUTION

SATCOM ON THE MOVE (SOTM)

The seamlessly integrated systems on the vehicle not only guarantee secure broadband communication but also ensure uninterrupted connectivity while in motion.

Managed service SATCOM on the Move (SOTM)

SNL owns many of SOTMs vehicles to deliver the required services to the end user as per the client expectation.

VSAT MOBILITY SOLUTION

SATCOM ON THE PAUSE (SOTP)

Connectivity and internet service will be promptly accessible to the customer as soon as the vehicle attains a stable position.

Managed Service using
SATCOM ON THE PAUSE (SOTP)

The SOTP terminal is ideal to cover extensive geographical areas or to be used by emergency units which need a fast communication.

SOTP is a highly compact integrated satellite terminal designed for automatic deployment and reliable communications through any of the existing satellites.

LEO MARITIME SERVICES

ADVANCE LEO'S HIGHLY DIFFERENTIATED VALUE PROPOSITION

HIGH SPEEDS & LOW LETENCY

- Up to 195Mbps user experience
- 100ms RoundTrip Time (RTT)

ENTERPRISE-GRADE CONNECTIVITY TO UNCONNECTED REGIONS

Multiple levels of QoS to support demanding Carrier & Enterprise network applications

Areas in the world without or with limited Broadband Access

NEW GENERATION OF LEO TERMINALS

- User terminal form factors for each market
- Download peak speeds up to 195 Mbps
- Industry standard interfaces to customer equipment for simplicity of integration

DIFFERENTIATED GO-TO-MARKET APPROACH

Partnering with – not competing – the ecosystem leveraging strengths, presence and relationships

TETRA RADIO

SNL is unwavering in its commitment to delivering cutting-edge solutions, offering comprehensive support from conceptualization to implementation, as well as technical services to empower our customers in achieving their business and strategic objectives within the TETRA domain.

To ensure the realization of our customers' goals in both governmental and private sectors, we have fostered robust relationships with key manufacturers in the TETRA domain. SNL's strength lies in leveraging the latest tools and technologies, allowing us to provide unparalleled TETRA solutions across various industries such as manufacturing, hospitality, retail, offices, and particularly in governmental sectors, notably MOI (Ministry of Interior) and MOD (Ministry of Defense).

With the capability to deliver turnkey solutions, managed services, and training, SNL extends its expertise within and beyond the Kingdom, specializing in secured communication domains. Our dedication to excellence underscores our role as a trusted partner in advancing secure and efficient communication solutions for our valued clientele.

TACTICAL COMMUNICATION

L-TAC stands at the forefront, delivering global satellite-based beyond line-of-sight communications on the move, catering to the specific needs of UHF, VHF, and TETRA military tactical radio users. Our cutting-edge technology ensures seamless and reliable communication, empowering military personnel with unparalleled connectivity in dynamic operational environments.

DIGITAL RADIO MOBILE (DMR) SOLUTION

Saudi Net Link is a leading provider of end-to-end DMR solutions, supporting both Tier II and Tier III standards. Through successful project implementations, SNL empowers clients by hosting critical applications on-premises within private networks, ensuring connectivity in isolated sites for enhanced resilience and efficiency in communication infrastructure.

P25 PHASE 1 AND PHASE 2 SOLUTIONS

SNL is committed to the innovation and delivery of top-tier P25 solutions, characterized by their robustness, interoperability, and security. Offering a spectrum of both P25 Phase 1 and Phase 2 open standard-based elements, SNL is well-equipped to provide customers with comprehensive end-to-end solutions tailored to meet their unique organizational requirements.

CYBER-FORTIFYING SYSTEMS & NETWORKS

JAMMERS SECURITY SYSTEMS

In addition to our core offerings, Saudi Net Link is dedicated to ensuring the full spectrum of secured and critical communication. To meet the stringent requirements of our VIP and governmental clientele, we specialize in providing jamming solutions tailored to their specific needs. Our comprehensive range includes portable, convoy, and on-wheel solutions, extending even to buildings.

Beyond merely addressing mobile and GSM (2G, 3G, 4G, 5G, and CDMA) frequencies, our expertise extends to blocking GPS, Wifi, VHF, UHF, TETRA, DMR, and drone signals. SNL's cutting-edge solutions cover a wide range of frequencies and signals, reinforcing the security and resilience of communication networks.

IQ Sports Producer

Create live professional sports
productions without onsite camera team

Record   Live Stream   Highlights   Multi Streams
Social Media   Professional Broadcast   Analysis

IQ-Sports Producer (IQ-SP) is a leading AI system that automates a
televised professional sports production but without the need of a
camera team or director. Ideal for sports games that don't have the
capital and production resource of the major leagues. It is ideal for tier
2 leagues, sports rights holders, colleges and schools as well niche
sports events. It can be utilized by major clubs for training sessions,
U21, U18 and other grass roots games where budget con- straints
prevents a full on-site production and outside broadcast team.

E-LEARNING

Saudi Net Link offers comprehensive solutions to companies, delivering web-based training products to enhance customer communication in a more convenient and effective manner. Additionally, we provide a diverse range of services to support companies in meeting their various learning needs.

OUR SERVICES INCLUDE:

- Developing sustainable solutions to meet organizational and learner needs
- Empowering learners to learn in the ways most effective for themselves
- Identification and selection of appropriate technology platforms
- Overcoming learning issues associated with the medium identification and selection of appropriate tools and methodologies
- Designing appropriate learning infrastructure and methodologies business requirements and training needs analysis

INNOVATIVE BUSINESS

With its deep understanding of the customers' diversified demands, and several years of experience in the smart IoT field, Dahua Technology actively explores new areas including machine vision & AMR, video collaboration, smart fire safety, automotive electronics, smart storage, smart security check, smart display and control, smart thermal imaging, etc., in order to provide more complete solutions to its customers worldwide.

01 MACHINE VISION & AMR

Zhejiang HuaRay Technology focuses on machine vision and mobile robot R&D, production and sales, and has industry leading techniques in image optimization, recognition algorithm, navigation and positioning. Products and solutions of the company are widely used in logistics, automotive, 3C, new energy and pharmaceutical industries. Its visual products include industrial cameras, intelligent cameras, 3D cameras and lenses, which are mainly used for code reading and recognition, defect detection, measurement, and positioning. Its mobile robot products covers latency, traction, forklifting, and sorting, which are mainly used in logistics warehouses and material handling.

02 VIDEO COLLABORATION

Founded in August 2016, Zhejiang Huazhuang Vision Technology Co., Ltd (Huazhuang Vision) is committed to developing leading video conferencing products and remote collaboration solutions for global users. Its brand, Hitrobrink, covers a comprehensive range of conferencing products including USB cameras, conference cameras, mic & speakers, video conference system, interactive whiteboard, accessories, etc. It also provides solutions for small, medium and large conference rooms and private spaces.

03 SMART FIRE SAFETY

With features ideal for home and business, Wisustarm is an advanced global manufacturer of the safety products that can help protect people and properties from fire and related hazards. Wisustarm builds and grows by utilizing Dahua's many years of experience in the industry. Since its establishment in 2015, more than 60% of its employees are engaged directly in R&D, working hard to explore the integration of video and fire detection. Through cutting-edge split-spectrum smoke sensing technology and smart IoT technology, Wisustarm is committed to making the world a safer and smarter place to live.

04 AUTOMOTIVE ELECTRONICS

With video as its core, Zhejiang Huaruijie Technology is engaged in smart driving business, providing advanced automotive electronics products and solutions to the world, and actively expanding automotive's before and after market. Its products cover a full range of on-board cameras, on-board terminal hosts, active safety products, auxiliary driving devices, panoramic 360 viewing system, etc. They have been widely used in freight logistics, public transport, school buses, sanitation trucks and other application scenarios.

INNOVATIVE BUSINESS

05 SMART STORAGE

Dahua Memory focuses on the R&D, manufacturing and sales of storage products, and serves the consumer market with standards that meet the high requirements of the industry. The company keeps innovating and researching about the storage field, and offers advanced memory card, SSD, U-Disk, PSSD, DRAM, NAS and other retail products. Its business covers consumer, enterprise and industrial markets, and meets the needs of various application scenarios, providing a new storage experience to its world-wide users.

06 SMART SECURITY CHECK

Zhejiang Huajian Technology Co., Ltd. (Huajian Technology) adopts Dahua's award-winning deep learning algorithms, image and signal processing technology, and IoT technology, providing a portfolio of solutions consists of project-oriented products such as WTMD, security screening system, retail loss prevention system and software platform. It delivers precise, reliable and comprehensive AI solutions to various verticals including retail, energy, finance, and transportation. Huajian Technology owns the waythuan trademark.

07 SMART DISPLAY & CONTROL

With more than ten years of industry technology experience, the Dahua Images and Graphics Business Global Department has developed a full range of product line covering LED displays, LCD displays, DLP real projection splicing, information display devices, control systems, etc. Focusing on product planning, marketing, project delivery and after-sales services, it constantly puts emphasis on products and solutions related to display and control. It has also contributed several success stories in the industry.

08 SMART THERMAL IMAGING

With thermal imaging technology as its core, Huajan Technology provides a complete set of modules, powerful machine vision products, and comprehensive solutions. Its products and solutions are widely used in industrial temperature measurement, natural ecology, new energy, carbon neutrality, perimeter protection, outdoor sports, consumer electronics and many other fields. The company is committed to further enhancing temperature sensing technology and developing leading thermal imaging products and solutions to serve its global customers.
